Homepage

- 1** Click the 'Dashboard' button to navigate to the dashboard page.
 - Visualisation of analysis on cancer survival rate.
- 2** Click the 'Personalize' button to navigate to the Personalize page.
 - Cancer survival rate predictions.
 - Cancer treatment recommendations.
- 3** Click the 'Information' button to navigate to the information page.
 - Cancer survival rate information.
 - Cancer treatments information

Dashboard Page

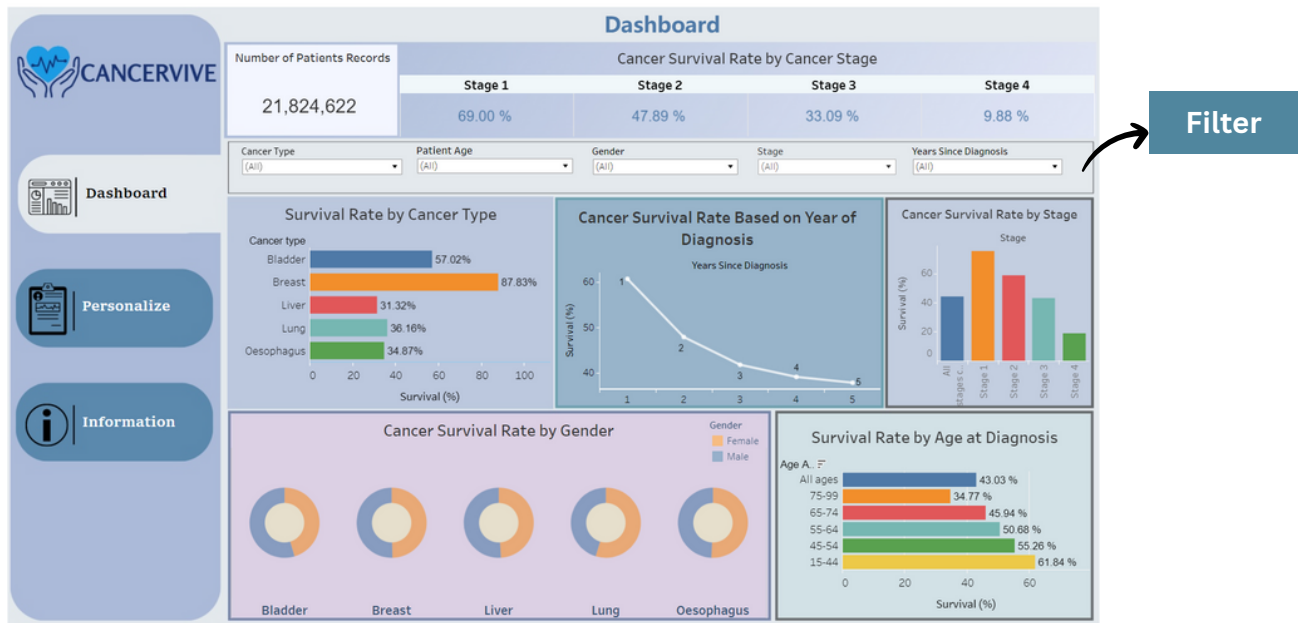

- 1 Total number of patients records in cancer survival data that is analyze.
- 2 Average cancer survival rates based on cancer stage (Stage 1-4)
- 3 Visualization of average cancer survival rate by cancer type
- 4 Visualization of average cancer survival rate by year of diagnosis (year-survival rate)
- 5 Visualization of average cancer survival rate by cancer stage
- 6 Visualization of average cancer survival rate of cancer type by gender
- 7 Visualization of average cancer survival rate by age at diagnosis
- 8 Dashboard filter
- 9 Navigation Menu

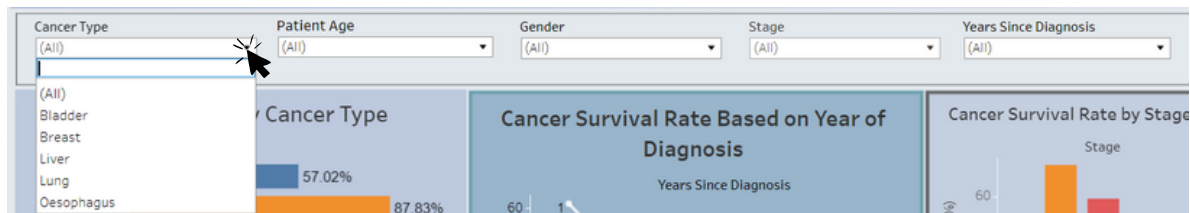

Dashboard Page

Personalise dashboard view

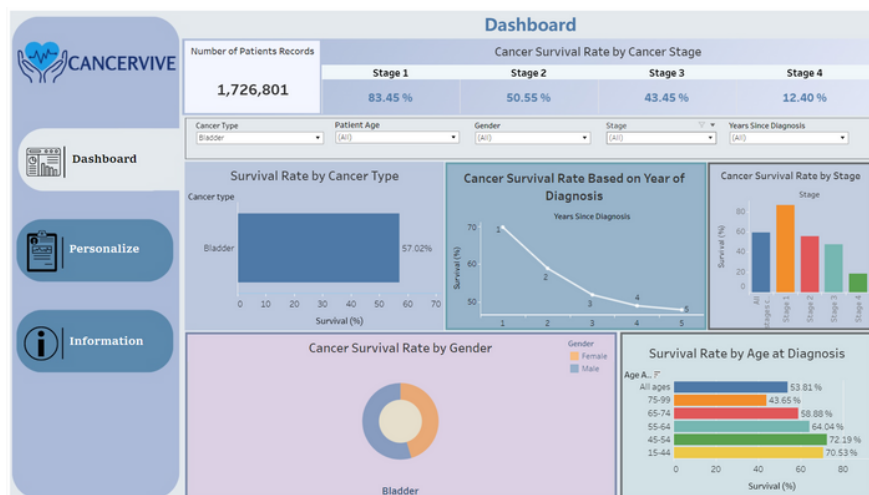

Personalise dashboard view by using filter function

1. Click the "down arrow" in the filter.
2. Select the data that want to filter to personalize the dashboard view.

3. Number of patient records, average cancer survival rate, and visualization charts will change based on the filtered data.

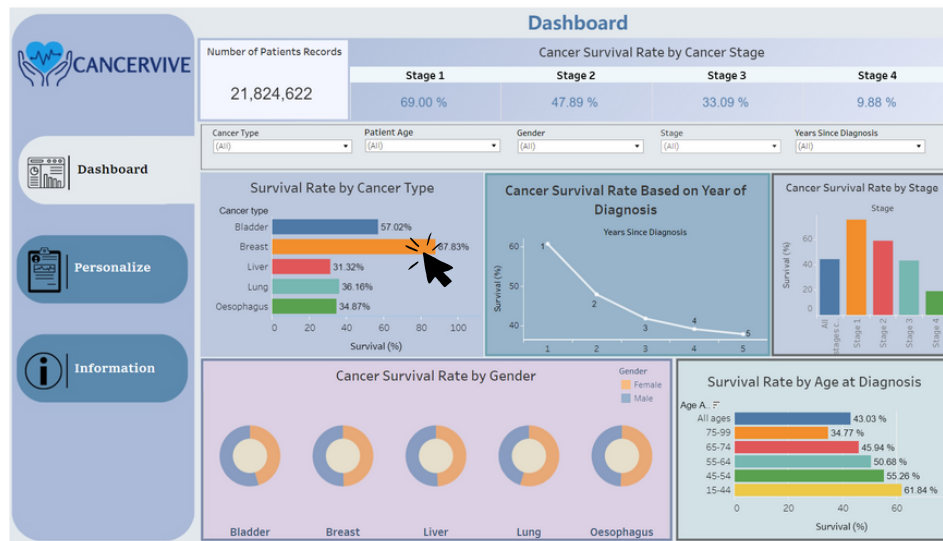

Dashboard Page

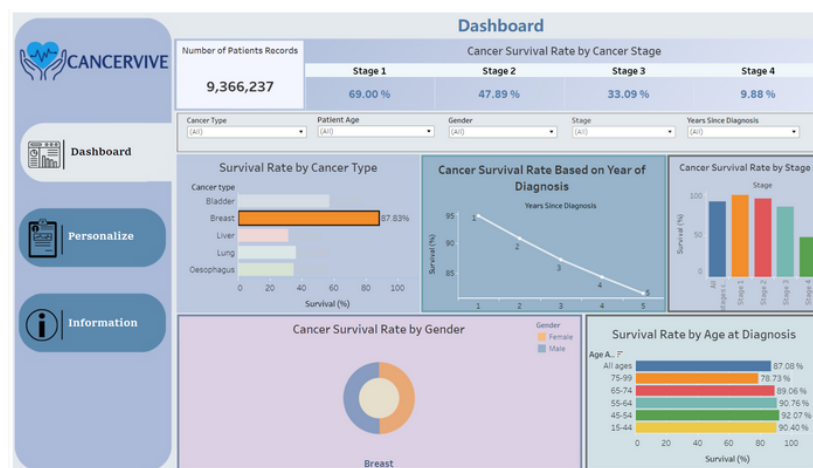

Personalise dashboard view

Personalize dashboard view by using the dashboard graph interactive function

1. Click one of the data in the visualization graph in the dashboard

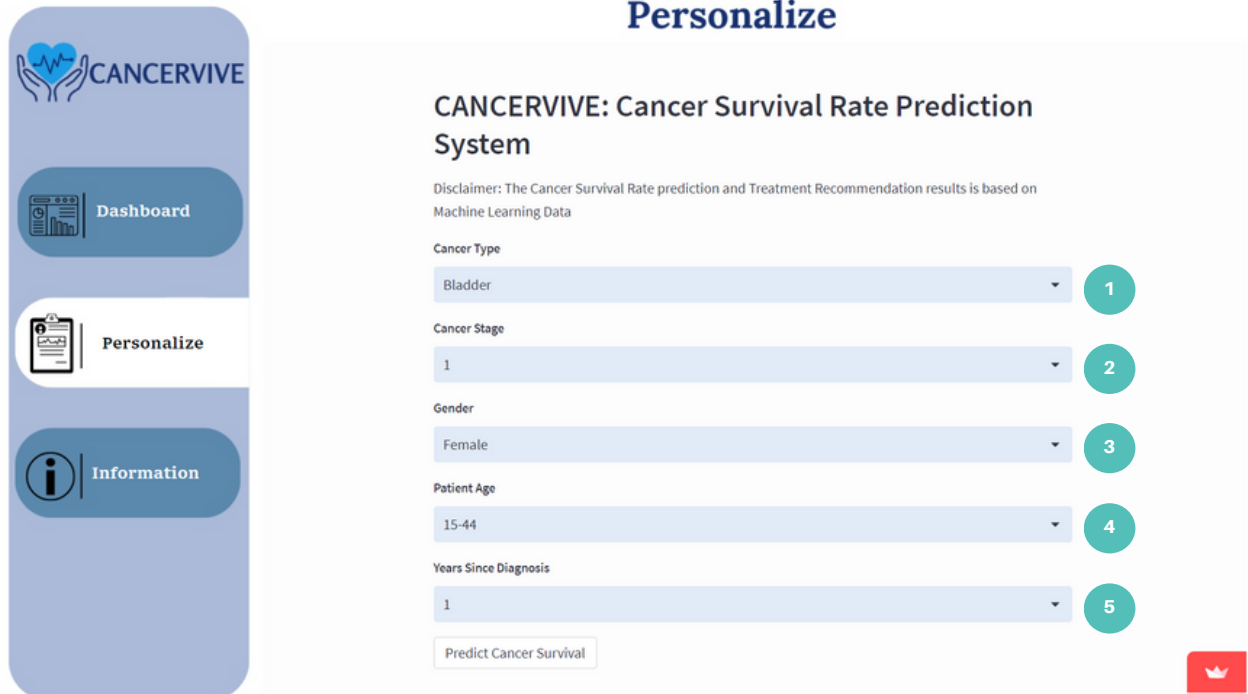

2. The number of patient records, average cancer survival rate, and visualization charts will change based on the chosen data.

3. Click on the selected data again to reset the dashboard view.

Personalize Page

Predict cancer survival rate and recommend treatment.

- 1** Cancer Type: Choose the patient's cancer type
 - Bladder Cancer
 - Lung Cancer
 - Breast Cancer
 - Liver Cancer
 - Oesophagus Cancer
- 2** Cancer Stage: Choose the patient's cancer Stage (Stage 1-4)
- 3** Gender: Choose the patient's Gender
 - Female
 - Male
- 4** Patient Age: Choose the patient's age
 - 15-44
 - 45-54
 - 55-64
 - 65-74
 - 75-99
- 5**
 - Years Since Diagnosis: Select the number of years since patients' diagnosis (1-5 years).
 - This input can also be interpreted as the survival rate over a period of 1-5 years to understand the survival rate within that time frame (year survival rate).

Personalize Page

Predict cancer survival rate and recommend treatment.

1. Click the Personalize button on the home page or navigation menu
2. Users input the cancer informations.
3. Click " Predict Cancer survival" button

Predict Cancer Survival

" Predict Cancer survival" button

4. After clicking " Predict cancer Survival" button, scroll down the page to view the prediction of the patient's cancer survival rate results and recommended treatments.

Patients Survival Rate Prediction

46.02%

Cancer Treatment Recommendation for Oesophagus Cancer

- Tumour Resection
- Radiotherapy
- Chemotherapy

Information Page

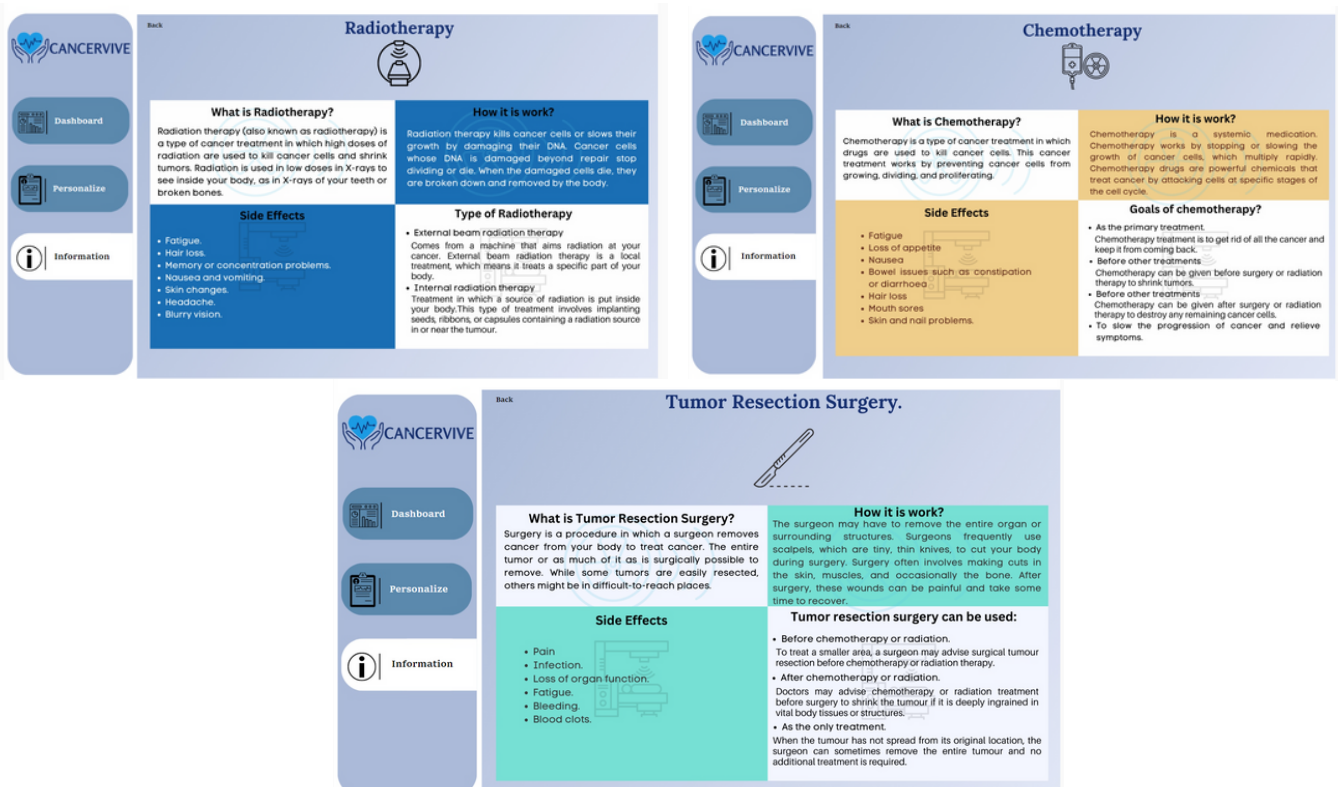

What is Cancer Survival Rate

- The **cancer Survival Rate** is the percentage of people who survive a specific type of cancer for a given period of time as indicated by cancer survival rates or survival statistics. These rates are based on historical data and can vary significantly depending on the type and stage of cancer, as well as individual factors such as age, gender, and overall health. It's important to remember that survival rates are estimates and cannot accurately predict an individual's outcome.
- Doctors need to know cancer survival rates to make informed treatment decisions, manage expectations, and plan. This contributes to the development of trust and a solid doctor-patient relationship. To help patients cope, doctors must sensitively convey the information and help.

Treatment Information

1. Click the "Information" button on the home page or navigation menu
2. Users will see information about cancer survival rates and a treatments. Clicking the treatments page button will provide additional information about treatment options.
